

Aeroquip AE272 Flexwrap— Field Replaceable Silicone Firesleeve

Aeroquip Flexwrap Silicone Firesleeve provides for easy field replacement of firesleeve and repair of hose assemblies at the operator level.

Flexwrap sleeving is a split sleeve which allows minimum sleeve diameters to be installed (wrapped) over hose assemblies regardless of end fitting configuration.

Flexwrap sleeving is a silicone impregnated fiberglass cloth (no asbestos) which has been successfully fire tested with Compression Crimp Fittings and **“super gem”**® reusable fittings. Testing to TSO requirements for medium and high pressure Teflon hose assemblies has been completed.

Teflon is a DuPont trademark.
